Publications

Influence of gravitational waves upon light in the Minkowski background: From null geodesics to interferometry
How does light move in a generic metric-affine background?
Unified approach to coupled homogeneous linear wave propagation in generic gravity
Evolution of the electric field along null rays for arbitrary observers and spacetimes

Lucas Santana

Head of Staking @ Hashdex
Rio de Janeiro, Rio de Janeiro, Brazil

Summary

Head of Staking at Hashdex.

Bridges the gap between complex theoretical frameworks and actionable digital asset strategies, backed by over four years of deep-sector experience in crypto research and asset management. Complemented by two years of specialized research and modeling within the oil and gas industry.

A rigorous scientific inquirer holding both a BSc and a PhD in Theoretical Physics from the Federal University of Rio de Janeiro, applying a first-principles approach to problem-solving and extracting meaningful insights from complex data across diverse fields, including digital assets, cosmology, and geosciences.

Thrives at the intersection of technical depth and clear communication, delivering high-stakes inputs for executive leadership and global clients, making the complex accessible.

Experience

Hashdex
4 years 8 months
Head of Staking
December 2025 - Present (8 months)
Rio de Janeiro, Brazil

Research Lead
December 2024 - November 2025 (1 year)
Rio de Janeiro, Brazil

Research Analyst
September 2022 - November 2024 (2 years 3 months)

Rio de Janeiro, Brazil

Conducts extensive market research on Bitcoin, Ethereum, alternative Layer-1s (both EVM and non-EVM chains), scaling solutions, decentralized finance (DeFi) and non-fungible tokens (NFTs). Provides in-depth technical knowledge for staking operations (bonding/unbonding periods, entry/exit churns, sweeping cycles, etc.). Skillful user of Python and its suite of data analysis/visualization libraries, alongside SQL, to retrieve and process both on-chain and market data from a variety of crypto sources. Can navigate crypto explorers with ease, and uses Dune Analytics as the go-to on-chain analysis platform, alongside Glassnode and CryptoQuant.

Junior Research Analyst II

December 2021 - August 2022 (9 months)

Rio de Janeiro, Brazil

Wrote a Primer on Smart Contracts and helped both envisioning and creating the marketing material for the launch of a crypto ETF in Brazil. Participated in several calls showcasing the investment thesis for Layer-1s, including Ethereum and its competitors. Responsible for creating workflows to gather on-chain and crypto market data, creating in-house intelligence to track the developments in the crypto market, and constantly providing updates for internal shareholders and external clients.

CGG

2 years

Geophysicist II

December 2020 - September 2021 (10 months)

Rio de Janeiro, Brazil

Worked on production and research projects for datasets with different acquisition types, being responsible for preprocessing and velocity model building routines (full-waveform inversion, ray-based tomography and interpretation). Daily workflow involved a lot of Python, shell scripting, and simulations in high performance computing (HPC) environments.

Geophysicist I

April 2020 - November 2020 (8 months)

Rio de Janeiro, Brazil

Started developing intelligence and a workflow for a new imaging technology being tested in the Rio center.

Geophysicist I

October 2019 - March 2020 (6 months)

Houston, Texas, United States

Introduced to seismic processing and velocity model building, having the opportunity to work on a production project in the Houston center targeting the Gulf of Mexico.

Education

Federal University of Rio de Janeiro

Doctor of Philosophy - PhD, Theoretical and Mathematical Physics · (March 2017 - March 2023)

Federal University of Rio de Janeiro

Bachelor of Science - BS, Physics · (2013 - 2016)
